

“COMMUNITY JACKPOTS”

- A **Community Jackpots** level is a mystery based jackpot game where the main prize is won by one player and a secondary prize called 'Community Jackpot Shared Prize' is shared between multiple players.
- A **Community Jackpots** game advertises one main jackpot prize plus a secondary shared prize. When a player triggers the main prize a fixed number of participating players are randomly chosen to share in the advertised Community Jackpots shared prize.
- Create a new atmosphere of excitement in jackpot gaming with **Community Jackpots**.
- Players that win the **Community Jackpots** Shared prize may also bask in the glory of winning along side with the main prize winner.
- More winners per jackpot hit means more excitement.
- Breathe new life into your mystery jackpot systems by installing a **Community Jackpots** game.
- Spread delight among multiple players instead of only one when the jackpot is hit / won.
- The main benefit of the **Community Jackpots** game is that players don't get the feeling that they were chasing the jackpot and they miss out on winning. With the **Community Jackpots** players are awarded for participating albeit sort of like a consolation prize.
